Career Objective

Motivated B.Tech Computer Science student aspiring to secure an entry-level AI / Machine Learning Engineer role. Strong foundation in Python, machine learning, deep learning, and computer vision, with hands-on experience in building CNN-based models, data preprocessing, deploying ML applications, and developing AI-powered systems using LLMs and NLP pipelines. Passionate about solving real-world problems using intelligent systems.

Technical Skills

• Languages: Python, SQL, C++, C
• Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Plotly, TensorFlow, OpenCV, Scikit-learn, Streamlit
• Tools & Platforms: Power BI, MySQL Workbench, Docker, GitHub, Visual Studio Code, Streamlit Cloud, Microsoft Office, Kaggle
• Concepts: Data Cleaning, Data Visualization, Machine Learning, Database Management Systems (DBMS), Networking, Object-Oriented Programming (OOP), Cloud Computing

---

Experience

AI / Machine Learning Intern | Quest Digiflex Pvt. Ltd., Indore | Jan 2026 – Present

• Worked on AI-powered applications using Python and machine learning frameworks.
• Developed LLM-based systems including an AI-powered travel itinerary generation platform.
• Built multilingual NLP pipelines for automated translation of temple website content.
• Developed speech-to-speech AI assistant systems integrating speech recognition and text-to-speech modules.
• Designed backend workflows, prompt engineering pipelines, and AI data processing systems.
• Contributed to debugging, testing, and optimization of AI systems to improve reliability and response quality.

Projects during internship:-

AI Travel Itinerary Generation System | Python, LLMs, OpenStreetMap API, Wikipedia API

• Designed and developed an AI-powered travel itinerary generator capable of automatically creating structured travel plans including POIs, meals, and activities.
• Integrated OpenStreetMap and Wikipedia APIs to improve contextual accuracy of travel

recommendations.
• Built prompt engineering pipelines to generate structured and location-aware travel itineraries.
• Implemented backend scripts for activity extraction, itinerary structuring, and workflow automation.

Mahakal Multilingual AI Translation System | Python, NLP, Indic Language Processing
• Developed a multilingual AI translation system to dynamically translate Hindi temple website content into multiple Indian languages.
• Built automated translation pipelines using open-source NLP models for scalable language processing.
• Implemented structured JSON-based translation storage to maintain language consistency across the system.
• Designed glossary-controlled translation logic to preserve religious and cultural terminology.

Speech-to-Speech AI Assistant | Python, Speech Recognition, Text-to-Speech
• Built an AI-powered speech-to-speech assistant capable of processing spoken user queries and generating voice responses.
• Integrated speech recognition, natural language processing, and text-to-speech modules for real-time interaction.
• Implemented wake-word detection and real-time audio processing for responsive system interaction.
• Designed the system for interactive voice-based assistance in web and application platforms.

Academic projects:-

Leaf Disease Detection | Python, TensorFlow, OpenCV
• Designed and trained a CNN-based image classification model to detect plant leaf diseases.
• Implemented image preprocessing, resizing, normalization, and data augmentation.
• Achieved accurate multi-class disease prediction using TensorFlow.
• Built a Streamlit-based web interface for real-time image upload and inference.
• Focused on reducing overfitting through dataset balancing and validation.

Blinkit Dashboard | Python, Pandas, Plotly, Power BI
• Designed an interactive dashboard to analyze blinkit content by products, ratings, and date & delivery location.
• Utilized Pandas for data manipulation and Plotly for interactive visualizations.
• Provided data-driven insights to aid in strategic decision-making.

Certifications

• Data Visualization with Cognos Dashboard Embedded – IBM
• Python for Data Science and AI – IBM
• Cybersecurity Fundamentals – IBM SkillsBuild
• Database Management Systems (DBMS) – NPTEL
• Cloud Application Developer – IBM SkillsBuild

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering in collaboration with IBM – Data Science
Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore | 2022 – 2026
CGPA: 7.04
Class XII (CBSE) – Gurukul School | 2021 – 2022
Percentage: 65%
Class X (CBSE) – Gurukul School | 2019 – 2020
Percentage: 75%

Achievements & Activities

• Participated in multiple basketball tournaments at inter-school and university levels.
• Earned IBM and NPTEL certifications in core technical subjects.
• Internal hackathon winner SIH-2025
